WBS

# Description of the WBS

Work breakdown structure consists of 4 main parts:

- Planning, which is done by the whole team
- Development – where the whole team is split in order to perform individual tasks
- Launch – making sure that the whole structure can perform the required task
- Data retrieving – this part could be considered as a part of launch, however, it requires additional tasks, which are not included into the launch sequence, such as search and rescue.

All of the parts are divided into levels by the color of the group- the more transparent – the lower the lvl is.
